## PROJECTS

### Titanic Survival Predictor

- ▣ This application is based on supervised machine learning technique.
- ▣ There is one data set which contains information about all passengers from titanic.
- ▣ We first clean the data set and apply Logistic regression technique predict whether the passenger can survive or not depending upon the data entries.

### Hand-written Digit Recognition

- ▣ This application is based on artificial neural network.
- ▣ The neural network is trained using back propagation technique to predict a digit.

### Web Scrapper

- ▣ This application is based on scrapping technique implemented in python.

### PeerTag (07/2020 – Present)

- ▣ In this project we are developing a website under Ergo EduCorp LLP.
